

Accelerate your Application Compliance initiatives with ZipKits for TrueSight

Challenge

- **Regulatory compliance** continues to evolve making it increasingly difficult to sustain and ensure proper governance
- BMC's TrueSight Automation for Servers delivers a strong foundation for compliance management however **application compliance remains a critical gap** in addressing the challenge.

Solution

- **Drive strong governance** of application compliance through **pre-built** regulatory compliance package "ZipKits".
- **Easily incorporated** within a TrueSight Server Automation (TSSA) environment to significantly **minimize Time to Value**, eliminating months of manual labor while ensuring consistent applications of governance.
- **Pre-built Application Component Templates** incorporate all of the necessary parts, objects, rules, evaluations, extended objects, and external integration components to assess compliance against each regulatory control. "ZipKits" are easily imported into any BMC TSSA instance.

VVL has been helping clients achieve regulatory compliance for over a decade
